SUMMARY

Dedicated Cybersecurity professional specializing in Security Operations (SOC) and Blue Teaming. Highly proficient in real-time security monitoring, log analysis, and incident response utilizing industry-standard SIEM platforms (Wazuh, Stellar Cyber). Proven track record in threat mitigation, system hardening, and automated forensics, backed by a 1st Place National Cyber Security Award from BSSN. Strong analytical mindset with a TOEIC score of 720, ready to maintain enterprise-grade security posture and SLA compliance.

EXPERIENCES

PT Sembilan Pilar Semesta - SOC Analyst L1

February - April 2026

- Executed security hardening on internal Linux servers based on CIS Benchmarks, reducing potential attack surfaces by disabling unused ports and securing configuration files.
- Monitored and analyzed an average of 50+ security alerts daily via Wazuh and Stellar Cyber SIEM, achieving a 100% triage rate and successfully mitigating 10+ high-risk threats weekly before production impact.
- Conducted structured incident investigations following the NIST Incident Response Life Cycle, minimizing mean-time-to-detection (MTTD).
- Created and managed incident tickets using ITSM tools to ensure timely resolution.

Deltakode Indonesia - Field Operational Engineer

January - June 2025

- Provisioned and maintained secure virtualized environments utilizing Proxmox VE and VMware ESXi to host internal security monitoring appliances.
- Configured Mikrotik-based networks by implementing firewall rules, bandwidth management, and DHCP lease security to prevent unauthorized access.
- Managed and led intern team site audits for CCTV installation.
- Created technical documentation, including network topologies and device placement manuals.
- Deployed and maintained virtual environments on Proxmox and VMware to host internal security tools.

SMK Wikrama Bogor - CBT (Competency Based Test)

September - October 2024

- Assisted technicians and teachers in maintaining computer laboratory facilities.
- Managed OS installation and software updates for internal school competition.
- Managed hardware troubleshooting and network monitoring in the computer laboratory for student online assessment.
- Made daily updates for laboratories practice equipment.

PROJECT

Smart Innovation Challenge - Data Engineer

November - December 2025

- Built automated forensic reporting module that translates complex metadata, video, and audio analysis into human readable reports for investigators.
- Documented the modular microservices architecture (Next.js, FastAPI, Docker), creating a clear technical blueprint for system scalability and stability.
- Developed and optimized the backend data pipeline.
- Performed bug fixes and coordinated with cross teams.

EDUCATION

SMK Wikrama Bogor - Computer Network Engineering and Cybersecurity July 2023 - May 2026

- 1st Place Winner - Smart Innovation Challenge - The National Cyber and Crypto Agency (2025).
- 2nd Place Winner - Yamaha Open National Karate Championship - Indonesian Karate-Do Sports Federation (2024).
- Served as Team Leader of Cyber Security Club and IoT club at SMK Wikrama Bogor (2024-2025).
- Selected as Peer Counselor Team Leader for The Class of 28.
- Served as Committee Member for Scouting activities and events.
- Completed Occupational Safety and Health (K3) Training.

CERTIFICATES

- TOEIC English Proficiency Certificate - Score: 720 (2025).
- Fortinet Certified Fundamental
- **Google Security Operations - SOAR Analyst** by Google Cloud Security.
- **Ethical Hacking** by Cisco Network Academy.
- **Networking Basics** by Cisco Network Academy.
- **Classical Cryptography** by Cyber Academy.
- **Network Defense** by Cisco Network Academy.
- **Cybersecurity Essentials** by Cisco Network Academy.
- **Mikrotik Fundamental** by ID-Networkers.
- **ILO Project K3 Training Youth4OSH** by International Labour Organization.

TECHNICAL SKILLS

- **Security Operations:** SIEM (Wazuh, Stellar Cyber), Log Analysis, Alert Triage, Incident Investigation, EDR Monitoring, MITRE ATT&CK Framework, Incident Handling (NIST Framework), Threat Hunting, Vulnerability Assessment.
- **Security & Network Tools:** Tehtris, SOAR, Fortinet, Wireshark, MikroTik (VLAN, Advanced Routing), TCP/IP & DNS.
- **Operating Systems & Virtualization:** Linux (Ubuntu/Debian Server Administration), Windows Server, Proxmox VE, VMware ESXi, Docker.
- **Cloud & Databases:** AWS, Google Cloud Platform, Postgres, MySQL.
